

NOTICE

The Rocky Knoll Trail System is now open, though there is still work yet to be done. We realize that some of the corners are a bit tight and need to be reworked, we have some roots to remove yet in the old farm field areas, some of the small pump track area needs to be enhanced, some general cleanup needs to happen, and we would like to install a number of features yet. However, there is another 5 miles +/- of trail in our community that we can all enjoy and improve upon.

Future projects potentially include: finish turf removal on the yellow loop, ramps, curved wood features in some corners, earthen/rock curved features in some corners/areas, bridges, smoothing out the trail in the old fields, etc.

Trail passes will not be required. However, next summer we will begin asking for a yearly donation. Half will go into a dedicated maintenance fund for the trail that will allow material purchases for features, etc. The other half will be given to the Rocky Knoll Foundation as a thank you for their support and approval in the trail's development. The foundation purchases and provides items to the patients at the healthcare facility to help make their stay more enjoyable and comfortable. Please consider making the donation.

Be safe, know your limits, and please follow the posted rules.

For questions or suggestions, please call the Sheboygan County Planning & Conservation Department at 920-459-3060.
